

# MAVIN™ with Perception

## Dynamic range performance with object detection, classification, and tracking

### Key Features

- ▶ Customizable, low-profile, one-box solution required by automotive OEMs
- ▶ Perception software enables object detection, classification, and tracking
- ▶ Small object detection – near and far, at highway speeds of 130 km/h (80 mph)
- ▶ Low latency data
- ▶ Laser Safety Class 1 with unique Pixel-by-Pixel Automatic Emission Control
- ▶ Low-profile and low power for smooth integration and deployment
- ▶ Custom ASIC\* optimized for speed, cost, and seamless integration

\*planned for series

### Integration Possibilities on OEM Architecture

Safe mobility at the speed of life

DS0140020 Rev B  
MAVIN™

Feature	Specification		
	FPGA		
Field of view	Near	Mid	Far
	100° H x 25° V	50° H x 20° V	20° H x 10° V
Typ. angular res. (H x V) *	0.086° x .040°		
Data output frame rate	30 Hz		
Point / s	> 14 M		
Laser safety compliance	Class 1		
Wavelength	905 nm		
IP rating	IP 69		
Aperture	96 mm wide, 14 mm tall		
Bounding box size	135 mm wide, 35 mm tall, 241 mm deep		

\*Average resolution of the foveated area

**Dynamic Field of View**  
Seeing obstacles clearly at short- and long-range simultaneously

**Resolution at Range**  
Detecting and identifying smaller objects from longer distances

**Low Latency**  
Enabling drivers to make quicker decisions for safer outcomes

**Compact Design**  
Integrating multiple solutions into one compact unit

**Cost**  
Requires fewer and less expensive sensors
